

May 24, 1933.

Dear George;

I reached Los Angeles all right; the children are well and enjoying themselves well; I haven't been feeling well; so I went to see the doctor. From him I learned that I have appendicitis. He said it would be very foolish to take such a long trip without taking care of my health just because it may cause me trouble anytime. I'd be taking big chances.

In about a month I would be well enough and in better health if I took the operation right away. I could probably sail on the next boat leaving.

The doctor can write and  
have the trip cancelled  
until a later sailing in  
case I do take the operation.

Please wire or telephone  
me what to do because  
it is important I know  
right away.

I hope you are  
feeling well and are  
getting along nicely.

Your wife,  
Catherine.

~~P.S.~~

P.S.

It's better if you  
send a telegram  
right away.

Don't worry about the  
tickets because when the  
reason for delay is sickness  
the doctor can have the tickets  
transferred.
